Sunseeker 28M Yacht

# HIGH ENERGY

This is one of the most successful charter vessels we have ever had within our fleet with back to back charters including a successful Monaco Grand Prix Charter. Every client that has stepped on board has had a once in a lifetime experience with raving reviews of the yacht's presentation and the exceptional crew.

## Nonstop Energy!

The 'High Energy' yacht will not only thrill but also inspire those fortunate enough to spend any time on board. Spacious yet elegant and practical, the interior is superbly decorated and benefits from exquisite craftsmanship and cutting-edge design.

Wraparound glazing and full height windows give you uninterrupted panoramic views through the drop-down saloon balcony, while the dining area benefits from modern surroundings and clever use of space. Featuring sumptuous accommodation for eight guests in four cabins comprising a master midship cabin, one VIP forward cabin and two twin/double guest cabins, you will have more than enough room to escape and enjoy some alone time.

Four experienced and attentive crew members will be on hand to provide exemplary service throughout the charter ensuring every guest is left feeling relaxed and refreshed.

On the foredeck, two large sun pads and comfortable seating areas are perfect for a little alfresco dining or just to get away from it all after a busy day on the water. Alternatively head to the expansive flybridge and enjoy a glass of something cold while cruising along the coastline.

True to Sunseeker heritage, this masterpiece of design has been styled to perfection and as a result has become one of the world's favourite motor yachts.
